

MAYANK KUMAR VERMA

mayanklatest2025@gmail.com | +91-9310568828 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [Codeforces](#) | [LeetCode](#)

Backend-focused full-stack developer with hands-on experience shipping containerized services and REST APIs, plus applied AI-integration projects using Vertex AI and OpenAI. Comfortable across the stack from React/Next.js frontends to Docker-deployed backend microservices.

EDUCATION

Indian Institute of Information Technology, Bhopal

Aug 2023 – Jun 2027

B.Tech, Computer Science

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, System Design, CI/CD, API Design

Competitive Programming: Codeforces Specialist (1450+), CodeChef 4★ (1800+), LeetCode Knight (1784), 600+ problems solved

EXPERIENCE

Backend Developer Intern | Kolaba Cloud Solutions

Nov 2025 – Dec 2025

- Containerized backend and ML services with Docker, standardizing reproducible deployments across cloud-based microservices
- Designed and shipped REST APIs supporting ML batch-processing workflows, handling 1,000+ daily requests from internal service consumers
- Worked with the team to improve p95 response times on ML-serving endpoints through request batching and caching adjustments

Web & Mentorship Lead | Axios Development Club, IIIT Bhopal

Oct 2024 – Aug 2025

- Mentored 100+ junior developers on web technologies through 1:1 debugging sessions and code reviews on live projects
- Maintained the club's website (100+ monthly users) and delivered 4 technical sessions to 200+ peers on full-stack development

PROJECTS

Felion — AI Wellness Platform | *React, Node.js, Python, Vertex AI (Gemini), Docker, Cloud Run*

[Live](#) | [Github](#)

- **Architecture:** designed an event-driven microservice architecture on Google Cloud Run with asynchronous AI request processing, reducing median response latency under load in internal testing
- **Content & safety:** built a content pipeline (180+ affirmations, 70+ wellness tips, 20+ coding flashcards) plus a crisis-keyword detection layer that routes flagged conversations to helpline resources
- **Stack:** integrated Vertex AI Gemini for conversational features with Firestore for persistence, fully containerized with Docker for reproducible deploys

Trakx — Financial Expense Tracker | *TypeScript, Node.js, React Native (Expo), OpenAI API*

[Github](#)

- **Parsing pipeline:** built a regex-based parser converting unstructured bank SMS text into structured transaction records, validated at 85% accuracy on a sample message test set
- **Data & auth:** designed a transaction pipeline handling 1,000+ records with real-time analytics and JWT-based authentication
- **Delivery:** shipped both a web dashboard and a companion React Native/Expo mobile app from the same backend

ParkSense AI — Traffic Data Dashboard | *React, Node.js, FastAPI, Mapbox/Leaflet, Data Visualization*

[Live](#) | [Github](#)

- **What it does:** a data-visualization dashboard ingesting a public dataset of 50,000+ parking violation records, rendering spatial heatmaps of 10,000+ points to surface congestion hotspots across Bengaluru
- **Backend:** integrated 8 backend endpoints to serve map and forecast data, with API responses averaging under 200ms in local testing

CERTIFICATIONS

- Infosys Artificial Intelligence Primer Certification — infrastructure-oriented AI fundamentals
- Google Cloud Arcade 2025 — Completed 12+ skill badges across Vertex AI, Cloud Run, BigQuery, Gemini and cloud infra labs.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Backend & Data: Node.js, Express.js, REST APIs, Microservices, MongoDB, PostgreSQL, MySQL, Firebase, Unit/Integration Testing

Cloud & DevOps: Docker, GitHub Actions, CI/CD, AWS S3, GCP (Cloud Run, Vertex AI, Firestore), Nginx

Frontend: React.js, Next.js, React Native/Expo, Tailwind CSS, shadcn/ui, HTML5, CSS3

ACHIEVEMENTS

- Smart India Hackathon 2024 Finalist — led a team building a geolocation-based attendance system
- MUJ Hackathon — advanced to Round 3 with an AI Legal Advisor built on a RAG architecture
- Open-source contributor across 3+ organizations; merged PRs improving local dev server startup time by 10–13% (PR [#731](#), [#793](#))
