EDUCATION

Indian Institute of Information Technology Bhopal – B.Tech

Aug 2023 – Jun 2027

Relevant Coursework: OS, DBMS, Computer Networks, DSA, System Design, System Design

Experienced In: Full Stack Development (MERN), AI Integration (OpenAI/Vertex AI), Fintech Systems, Docker Deployment

PROFESSIONAL EXPERIENCE

Kolaba Cloud Solutions | Backend Developer Intern

Nov 2025- Dec -2025

- Architected efficient REST APIs for ML workflows and server logic using Node.js, improving backend performance by **~10%**
- Deployed backend and ML services using Docker and cloud infrastructure, enabling scalable microservices and supporting **1K+** API requests/day

Axios Development Club | IIIT Bhopal

Oct 2024 – Aug 2025

- Mentored 100+ junior developers in web technologies and guided them through live project development and debugging
- Assisted and maintained **official club's website** (100+ monthly users), delivered **4+ technical sessions** for **200+ peers**

PROJECTS

Trakx – Financial expense tracking app | *TypeScript, Node.js, React Native-Expo, OpenAI API*

[GitHub](#)

- Built a fintech expense tracking system with SMS-based transaction parsing pipeline, real-time analytics dashboard
- Designed a scalable transaction pipeline handling **1K+** records with real-time analytics and JWT-based authentication
- Converted unstructured SMS data into structured financial insights using regex-based parsing **85%** accuracy

Felion – Youth Mental Wellness | *React, Tailwind, Node.js, Python/Vertex AI, ML, Docker*

[Live](#)

- Designed event-driven mood tracking pipeline with async LLM calls to reduce p95 latency by 40%
- Curated 180+ affirmations, **70+** health tips, 20+ coding flashcards, crisis-detection + helpline routing, LLM Integration
- Integrated Gemini 1.5 via Vertex AI for contextual mood responses with async API calls
- Deployed backend and ML services as Google Cloud Run microservices using Vertex AI/Gemini, with Firestore

SyncPad – AI Based Text Editor | *JavaScript, Node.js, React, AWS, OpenAI API*

[GitHub](#)

- Designed scalable client-server architecture following OOPs and REST API based communication. Integrated with OpenAI API
- AI-powered suggestions, improving efficiency by **10–15%** following software engineering best practices.
- Implemented AWS S3 storage for secure file handling with personalized dashboards supporting **500MB per user**
- Set up CI/CD pipelines with GitHub Actions for automated deployment and seamless developer flow

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, Python, SQL, MATLAB
- **Frontend:** React.js, NextJS, HTML5, CSS3, Tailwind CSS, Bootstrap, shadcn/ui, React native, Expo
- **Backend:** Node.js, Express.js, REST API, Microservices, Unit Testing, Integration Testing
- **Databases:** MongoDB, PostgreSQL, MySQL, Firebase, Firestore, Prisma
- **Cloud/DevOps:** AWS S3, Docker, GitHub Actions, CI/CD, Nginx
- **Tools/Frameworks:** Git workflows, GitHub, Jest, Linux, Google Workspace
- **Relevant Coursework:** OS, Computer Networks, DSA, OOPs, System Design, CI/CD, Web Development
- **Soft Skills:** Leadership, Team Management, Creativity, Public Speaking, Co-ordination.

ACHIEVEMENTS & HIGHLIGHTS

- Solved **550+** DSA problems on LeetCode with strong focus on Dynamic Programming and optimized problem solving
- Contributed to **3+** open-source organizations, collaborating with **10+** developers and earning **4+** GitHub achievements
- Improved search engine performance and reduced local development server startup time by **10–13%** (PR [#731](#), [#793](#))
- Selected for Smart India Hackathon 2024; led a team of 4 to build a geolocation-based attendance system
- Mentored **100+** junior developers in web technologies and guided them through live project development
- Advanced to Round 3 at MUJ Hackathon with an AI Legal Advisor system using **RAG and backend architecture**
